

Testing for Arsenic, Cadmium, Lead and Mercury

Whey proteins from Hilmar Ingredients are nutritious and wholesome. They can be safely consumed at any level appropriate to human protein needs. Hilmar Ingredients performs daily testing on every lot of whey protein for Arsenic, Cadmium and Lead. Mercury is tested on a quarterly basis by an independent lab as it requires more sophisticated testing equipment and controls. Levels of these elements in our ingredients are typically zero, and at no time have results for any element surpassed levels of 0.5ppm.

All products from Hilmar Ingredients are in compliance with applicable State and Federal Regulations. If you have any questions about the quality of our products, please contact your sales manager or me.

A handwritten signature in black ink, appearing to read 'J. Looper', is positioned above a horizontal line.
